

ULTRACLEAN CLEANING ROLLER FOR MAXIMUM PRODUCTION PURITY

The MITEX UltraClean cleaning roller uses innovative adhesive technology for reliable particle removal – efficient, sustainable, and with no additional costs for consumables.

Effective cleaning: Removes 99.99 % of all particles from 5 μm

Cost saving: Low-maintenance and low-wear, no additional energy input required

Maximum efficiency: Reduces waste and increases efficiency and a fast return on investment

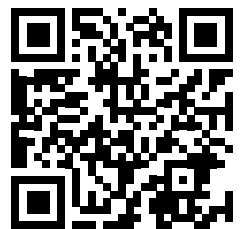

Flexible & simple: Universally retrofittable, simple installation, low acquisition costs

Sustainable: Regrindable, easy to clean and environmentally friendly

Convince yourself of your advantage:

Request your customized, ready-to-install system roller and test it for 4 weeks without risk.

APPLICATION EXAMPLES OF ULTRACLEAN

The ULTRACLEAN cleaning roller removes even the finest particles thanks to its innovative coating, ensuring maximum cleanliness in production.

The adhesive material structure maximizes particle absorption, while the surface can be easily regenerated with standard cleaners – ensuring long-lasting performance and a sustainable cleaning solution.

Examples for configurations:

- › Different levels of stickiness
- › Antistatic variant
- › FDA / BfR compliant
- › For all roller dimensions

ADDED VALUE FOR YOUR PRODUCTION

› CUSTOMIZED PRODUCTION:

Modular roller system for your system dimensions.

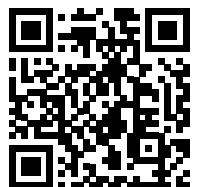

› UNIVERSAL AND SIMPLE:

Easy to retrofit in a wide variety of positions.

› NO RISK:

If the solution does not fit, simply send the roller back.
